

Mathematics Education Program helps students staying at the dormitory during the outbreak of COVID-19

Due to the COVID-19 outbreak control measures, which the government asked for cooperation from people to stop traveling across the province, including prohibiting entry & exit in some areas. As a result, some students in the dormitory are unable to return home during the semester break. In addition, the restaurant is closed due to the end of the academic year. Mathematics Education Program, in corporation with the International College, assisted students by providing food and drinking water within the dormitory at Nakhon Pathom Education Center.
