

The Project for Promoting Mathematics Teachers to Create Online Lessons

International College, Suan Sunandha Rajabhat University (SSRUIC) was supported the annual government budget 2020 from the Ministry of Education to do the Project for promoting teachers to create online lessons to improve Thai education in three subjects: Mathematics, Science, and English. The junior high-school teachers (300 teachers per subject) selected the topics from Basic Education Core Curriculum 2008 (Revision 2018) and designed lessons to be approved by SSRUIC lecturers. Due to COVID-19 pandemic, SSRUIC lectures adopt Facebook Live to give their suggestions to the junior high-school teachers through Question and Answer (Q&A) technique including new idea for learning and teaching mathematics.
